

ND PRV Pressure valve

Primary applications: for drip and micro-sprinkler lines and irrigation systems in residential and public gardens, traffic islands and parks

Main features

- Stabilizing regulator in pressure fluctuations
- Immediate response to pressure and flow rate fluctuations
- Excellent hydraulic performance
- Extra strong mechanical structure

Technical data

Flow rate: 0.01 m³/h²

Working pressure: 2.0 - 4.0 bar

Standard springs: 2.0 bar for driplines
